

Sass

Curso Completo

Tássio Gonçalves

Pré-processamento ou compilação com
Sass

Pré-processador

Um pré-processador é um programa que recebe texto e efetua conversões léxicas nele.

Pré-processador

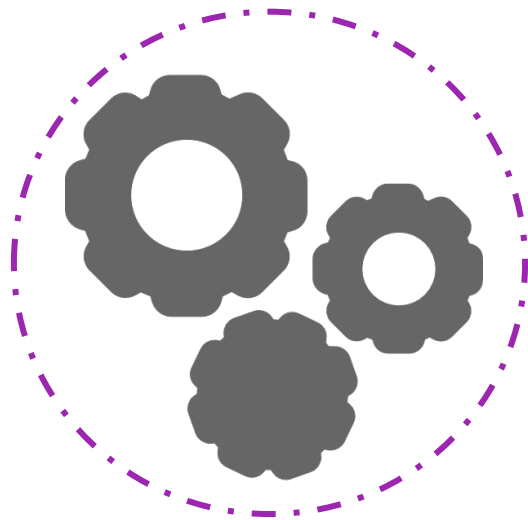

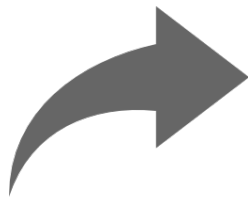

As conversões podem incluir substituição de macros, inclusão condicional e inclusão de outros ficheiros.

```
$font-size: 14px;  
$border: 1px solid black;  
h1{  
  font-size: $font-size;  
  border: $border;  
}
```

```
h1{  
  font-size: 14px;  
  border: 1px solid black;  
}
```
