

Tássio Gonçalves

O Sass permite que as regras CSS sejam aninhadas umas nas outras.

A regra interna aplica-se somente dentro do seletor da regra externa.

```
#main {
  width: 97%;
  p, div{
    color: #000;
    a{
      text-decoration: none;
    a:hover{
      text-decoration: underline;
  h1{
    font-size: 150%;
    color: red;
```

```
#main {
 width: 97%;
  p, div{
    color: #000;
    a{
      text-decoration: none;
    a:hover{
      text-decoration: underline;
  h1{
    font-size: 150%;
    color: red;
```

```
#main {
 width: 97%;
#main p, #main div {
  color: #000;
#main p a, #main div a {
  text-decoration: none;
#main p a:hover, #main div a:hover {
  text-decoration: underline;
#main h1 {
  font-size: 150%;
  color: red;
```
